

## Programmable RTD Probe with Current Output TSOJ

- ◆ Programmable conversion range
- ◆ 2-wire 4...20 mA output
- ◆ Easy & Fast connection plug
- ◆ Straight or angled cable connector
- ◆ Small dimensions
- ◆ Vibration-proof design
- ◆ High protection class - IP65

TSOJ measures temperature within the -50...200 °C range via a Pt100 sensitive element and converts it into standard 4...20 mA 2-wire signal. The configuration software "TraCon" enables programming of the measurement range and output direction as well as other parameters. The probe has a robust vibration-proof stainless steel sheath with IP65 protection class, and its interior is filled with special compound, which protects the electronics from the harsh ambient influences. TSOJ is equipped with a detachable connector that allows fast and easy electrical decoupling. Various stem diameters and lengths as well as stainless steel types are available. Thanks to its robust design and flexible programming, the TSOJ probe is a fast and convenient solution to varying problems involving temperature measurement and conversion in industrial environments.
